

Assesment 2- js – Basics Extra Credit

1. Tesla

According to [crunchbase.com](https://crunchbase.com/tesla) Tesla uses 46 different stacks for their technologies but the main stacks they use are HTML5, Google Analytics, and jQuery.

2. Space X

According to space.stackexchange.com Space X uses c and c++ stacks. That's what I had to use in college for my mechatronics class haha.

3. Northrup Grumman

According to northrupgrumman.com, Northrup Grumman uses Siemens Xcelerator as part of their technology stack as well as HTML5, Google Analytics and jQuery like Tesla.
